

Spray Kit: spray gun for application of sealants and mastics in cartridges. This gun allows application of all types of one component sealing compounds packed in aluminum, plastic, carton cartridges or bags. The products are applied texturized or in beads on doors, hoods, baggage compartments and other car parts. It also allows application of sealing adhesives for windcreens.

The kit includes:

- spray gun (max. 8 BAR)
- nylon piston for product in bag
- adapter for product in bag
- adapter for application of special products in beads and sealing adhesives, both in cartridges and bags
- external nozzle for rough peel (VW)
- external nozzle for fine peel (RENAULT)
- internal nozzle to be screwed to the cartridge
